

DEFENCE AND SPACE
Intelligence Solutions

From Constellation Terminal to Partner Operating Centre

A Solution Tailored to
Your Needs

AIRBUS

Partner Operating Centre

A turnkey solution to manage the whole satellite imagery tasking and production chain, up to product dissemination

Scalability

Available in three versions (Standard, Performance and Elite), the Partner Operating Centre gives you complete flexibility, allowing you to enhance the version of your choosing with the addition of other functionalities useful to you.

Still undecided? It's not a problem – functionalities can be added as you need them.

Outstanding production performance

The Partner Operating Centre can automatically generate the products you need: primary, projected and orthorectified. It can also produce stereo, multi-temporal stereo, geometrically consistent series products. In addition, automatic mosaic and 3D products can be provided.

Need to produce your AOI rapidly?

In less than 20' from download, you can have your urgent Pléiades Neo product on your desk!

The best altimetric and location reference layer related to your visibility circle will be included in your Partner Operating Centre.

Security

A secured solution to protect your data

The Partner Operating Centre will be equipped with the most powerful, cutting-edge security tools available.
